

Peanut Products Manufacturer

A high-angle, close-up photograph of a vast field of green peanut plants. The plants are densely packed, with their leaves and stems creating a textured, vibrant green surface. The lighting is bright and even, highlighting the natural colors of the vegetation.

Quality is our **passion.**

## Our Company

Galdisa is a family-owned business with multiple locations in Mexico, and the U.S. We have been in business for over 50 years, working as a main ingredient supplier to major food manufacturers within the food industry. Our main supply focuses on processing dry roasted peanuts, peanut granules, natural peanut butter/paste, and peanut butter.

# Company Facts

1. Headquartered in Mexico City with facilities in Northern Mexico, Central Mexico, and Texas (USA).
2. 50+ years in the peanut business, 20+ years serving global food companies, 400+ employees.
3. Vertically integrated throughout the peanut supply chain, with agricultural, manufacturing, and distribution operations.
4. Technologically advanced food processing operation. Between our Mexico & U.S. plants we can process over 100M pounds per year with the current physical space to grow as needed.
5. Galdisa is a member of:
  - a) American Peanut Council (APC),
  - b) Mexican Entrepreneurs Association (AEM)
  - c) Mexican National Chamber of Industries (CANACINTRA)

# Sustainability & Sourcing

Galdisa works with shellers and farmers worldwide to ensure that the peanuts we process are ethically and sustainably sourced, utilizing the best environmental practices in the industry, and making sure they meet rigorous nutritional health standards.

On top of having access to a wide array of shellers, Galdisa sponsors its own peanut growing program in Northern Mexico, under which only specialty varieties are

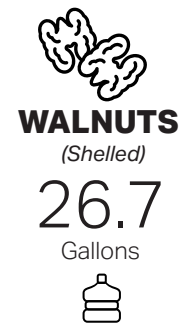

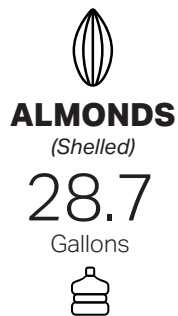

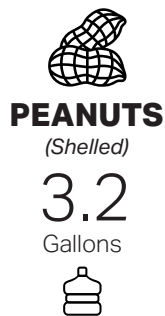

grown for particularly demanding niches of our market, achieving an unparalleled level of traceability from farm to table.

Peanuts are a zero-waste crop and have an incredible story of sustainability. They use significantly less water and are hardy, nitrogen-fixing plants, meaning they also need less fertilizer and pesticides to grow a successful crop, making them one of the smallest carbon footprints of any nut.

## Water Usage

U.S. WATER USAGE PER OUNCE, BASED ON BLUE WATER (IRRIGATION) FOR THE PERIOD 2000/2016 AND GREY WATER (TO ASSIMILATE APPLIED NITROGEN) FOR 2004/2013, GALLONS PER OUNCE:

**TO GROW 1 OUNCE**

Source: National Peanut Board, 2021.

A glass jar of peanuts is tipped over, spilling a large quantity of peanuts onto a light-colored surface. In the background, there are several cookies, one of which is partially broken. The scene is lit with warm, natural light, creating a soft and appetizing atmosphere.

## Our Products

Galdisa offers a variety of quality bulk peanut ingredients, perfectly suited for food manufacturers.

Among our portfolio we offer dry roasted peanuts, peanut granules, natural peanut butter/paste and traditional peanut butter.

We offer bulk packaging such as pails, carton cases, fiber drums, super sacks/big bags, and can even offer tankers.

# Roasted Peanuts

## PRODUCT DESCRIPTION

Our roasted peanuts are made from U.S. grade high-oleic runner type peanuts that are carefully dry roasted, split-nut blanched, sorted, and inspected to deliver a flavorful natural product that our customers love. Roasted peanuts are peanuts in their purest form, and they are ideal to be enjoyed at any social gathering, after an intense workout, as a topping, or to create recipes where peanuts are the main guest.

Organics available upon request.

	Net. Weight	Container Type	Units per Pallet
	30lb	Carton Case	60
	50lb	Carton Case	36
	2,150lb	Big Bag Tote	1

# Roasted Peanut Granules

## PRODUCT DESCRIPTION

Our roasted peanut granules are made from U.S. grade high-oleic peanuts that are carefully dry roasted, blanched, sorted, chopped, and sieved to deliver flavorful bits that our customers use as the perfect topping for bakery items, salads, ice cream, and more. Peanut granules not only add exceptional flavor to any food product but are also a great plant-based source of protein that can easily enhance their nutritional value.

# Natural Peanut Butter / Paste

## PRODUCT DESCRIPTION

Our natural peanut butter (also known as paste) is made from 100 % U.S. grade peanuts that are carefully dry roasted, blanched, and ground into a delicious natural butter. No other ingredients are added in the process, which make natural peanut butter an ideal solution for consumers that prefer avoiding sugars or that are looking to produce their own recipes for bakery items, snacks, and gastronomic creations overall.

Organics available upon request.

# Peanut Butter

## PRODUCT DESCRIPTION

Our traditional peanut butter is made from U.S. grade peanuts that are carefully dry roasted, blanched, and ground into a creamy delicious butter. Sugar, salt, and vegetable oil are also added into the process to enhance flavor and deliver a smooth spreadable product. Peanut butter is not only a family favorite, but also a great plant-based source of protein that contributes a high nutritional value to everyday life.

# Food Safety & Quality

Galdisa understands the necessity of reducing food safety related risks for consumers worldwide, and the importance of building trust throughout the supply chain. To bring the safest and best quality products to our customers we have implemented strict preventive control systems in each of our facilities. Our processing facilities are certified under the FSSC 22000 scheme. Even further, we are committed to delivering the most

reliable, and consistent product, and invest heavily in top of the line, innovative equipment.

While we are proud of our operations, we also believe that one of the most important factors of our business is knowledge. Therefore, we are committed to the continuous training and development of our employees, as we understand they are the main drivers of a successful safe supply.

You will always find a transparent and reliable partner in Galdisa. We strive to communicate our values in every business transaction and consider our commitment to food safety as our top priority.
